Aaqeboddin Khatib

PYTHON DEVELOPER

AI-Empowered Full-Stack Developer (Python & Django) Building innovative web experiences that leverage AI for enhanced functionality and user engagement. Ex-Transcriber Analyst

Experience

Transcriber Analyst

Realteam Systems Pvt.Ltd • Aurangabad, Maharashtra

- Responsible for transcribing audio recordings with accuracy and speed using transcription software and tools.
- This job required excellent communication skills, language proficiency, active listening, time management, problem-solving, attention to detail, customer service, orientation, multitasking, and technical proficiency.
- As a Transcriber Analyst, I was responsible for ensuring data confidentiality, maintaining quality standards, and meeting deadlines.
- This experience equipped me with skills such as data analysis, familiarity with regional accents, quality assurance, strong knowledge of phonetics, good research skills, and patience and empathy when dealing with customers

Python Developer

- I have played a vital role in designing, developing, and deploying sophisticated web applications that leverage cutting-edge AI to deliver exceptional user experiences and adhere to industry best practices across various devices and screen sizes.
- I have utilized the Django framework extensively to architect and implement scalable backend solutions. By leveraging Django's powerful features, including its robust ORM and built-in admin interface, I have efficiently managed data models, created database schemas, and ensured data integrity throughout the application.
- Skilled in Django's templating engine for dynamic, responsive UIs using HTML, CSS & JavaScript. Seamlessly integrated frontend components with backend for engaging experiences. Deployed on platforms like Netlify & GitHub Pages.
- Adhere to industry best practices, writing clean, maintainable, and efficient code.
- I have demonstrated expertise in building RESTful APIs, implementing authentication and authorization mechanisms, and optimizing performance for scalability. I have also integrated third-party libraries and AI APIs to enhance application functionality and streamline development processes.

Internship August 2023

Quantium • Software Engineering Virtual Experience Participant with Forage

- Utilized Dash framework to transform data into compelling narratives.
- Implemented optimization techniques to refine dashboard functionality and testing to ensure stability and reliability of application. Maintained code quality.

Projects

- AI App: Developed and Deployed AI-powered chat application utilizing OpenAI's API, similar to Chat GPT: ***Check Out***
- AI Image Generator: Created an innovative AI-powered image generator with OpenAI's API. Unique and creative images based on user inputs.
- File Sharing RESTful API: Developed a secure file sharing REST API using Django.
- Web App: Created a dynamic and scalable web application using Django.
- Sign-in Portal: Created a Django-powered sign-in portal with robust authentication and user management features for secure and seamless access control.
- Space Tourism: Building a captivating multi-page Space Tourism website with an intuitive design to showcase the wonders of space exploration.
- I'm currently building a portfolio website to showcase these skills.
- Witness the manifestation of my skills and passion at GitHub: ***Github/SimraanK***
